THE REDCLIFF REVIEW, THURSDAY, JAN. 16th 1930

Number 45

Local Representatives Address Meeting Here

Jimmy Brown Also Gives Report Of Boy's Parliament

A fairly representative gathering assembled at Cliff Hall last Friday evening to hear Dr. Gershaw M. P. and Mr. Hector Lang M. L. A. review the work done at the last sessions of both parliament and the legislature.

A feature of the evening was the introduction of Jimmy Brown, Redcliff's representative in the Boys' Parliament.

Mayor Worts acted as chairman for the evening. In introducing the speakers, the Mayor took advantage of the occasion, on behalf of the town, to thank Dr. Gershaw and Mr. Lang for the assistance they had given the council and himself on several occasions when called upon. He stated that they had willingly and cheerfully given of their time and had been most courteous when asked for help or advice.

Jimmy Brown gave a most interesting report of the sessions of the Boys' Parliament at its recent session at which he was a member. He explained that this parliament was conducted along the lines followed by the provincial legislature. Even among the 60 boy members, a premier, speaker, leader of the opposition and other officials are chosen to formulate the business of the meetings. Jimmy pointed out that to be a member of the parliament, a boy must not smoke or use liquor in any shape.

Among the resolutions passed at the last session, Jimmy said, were condemning cad training in schools; endorsing bible study at meetings; the promotion of athletic sports; world brotherhood; boys' and girls' council. Their source of revenue, he explained, was from the sale of shares, the proceeds from which were used to defray expenses at summer camps, etc. In closing he expressed the hope that the citizens of Redcliff would support the movement by buying some of those shares when given the opportunity later on.

Dealing with the Provincial Legislature, Mr. Lang referred to several resolutions which he had introduced at the last session. One was a petition for the completion of the C. N. R. branch line from here to Hanna. He had done because he felt the building of this branch would be of great advantage to the industries of both Redcliff and Medicine Hat. He had received the unanimous support of the legislature of this resolution.

After consulting with school teachers he said he had found it was their opinion that the course of studies in the high school were too severe. He brought the matter up in the house and was successful in getting enough support to have the condition changed. As a result pupils could now take the course in three years instead of four. His suggestion to have the teachers' and matriculation courses the same, was also endorsed. Mr. Lang also referred to the old pensioners and expressed the hope that teachers' pension would also soon be adopted. Reference was also made to Hon. Fern Baker's proposed new

educational bill. Mr. Lang thought that with some changes made in the bill it should be passed. While the Tilley East Area was not in his constituency he was greatly interested in the solving of its problems. He thought the commission should devote its whole time to this matter and get it settled as quickly as possible.

Dr. Gershaw gave a most interesting description of the work of the parliament at Ottawa, the make up and functions of the Commons and Senate and the manner in which the affairs of the country were conducted. The doctor said he noticed a great change in the house of late years. More harmony prevailed among the rank and file and leaders of all parties, and there was less desire on the part of all to try to make political capital out of questions coming before the house. Members took their positions seriously, he said, and he referred to cases where cabinet ministers impaired their health by the burden of their office. After drawing attention to the number of young people in the hall Dr. Gershaw said it was an encouraging sign. He then told of the important position Canada now holds in world affairs and of the greater possibilities when those young people in the men and women in charge of affairs. Our status is now such, he said, that we have complete control of all matters in connection with trade relations. Canada now has trade commissioners in almost every country in the world, as a result of which she is exporting scores of different commodities to every corner of the globe. Dr.

Mr. & Mrs. WILLIAM HENDERSON

Mr. Henderson celebrated his 91st birthday last Monday, Jan. 13. Despite his advanced years Mr. Henderson is still actively engaged in the rental and insurance business in town. He is also the trustee officer for the school and a Justice of the Peace. At the last council meeting he was appointed returning officer for the municipal elections next month. Mr. and Mrs. Henderson celebrated their diamond wedding a year ago.

Gershaw also explained the terms of the transfer of the natural resources to Alberta and said that with this matter now settled it should be much easier for the province to come to some definite plan regarding the Tilley East Area and also regarding debt adjustments. The Dr. closed with a reference to the League of Nations and the 1929 Peace Pact. He said that while much had already been accomplished there was still much to be hoped for. It was a matter in which all should unite and use individual and united efforts to help bring about the desired goal. The meeting closed with the singing of the National Anthem.

A number of local Oddfellows and Rebekahs attended the dedication of the new I. O. O. F. Hall in Medicine Hat. They report a most enjoyable evening.

Town Council Has A Quiet Session

There was a quiet session of the town council last Monday evening. As it is coming close to the end of the town year it is not customary to undertake any new business. That is no doubt the reason for the quiet session. The bylaw arranging for nomination day and election for the Mayor, council and school board, was given its second reading and passed. Mr. Wm. Henderson was appointed returning officer for the occasion. Arrangements were also made for the annual ratepayers' meeting to be held on Jan. 21st and the printing of the financial statement for same.

Mr. Magres Hogen, of Calgary spent last week in town visiting Mr. I. M. Zelsler.

COLONEL J. S. DENNIS RETIRES

Colonel J. S. Dennis, C.M.G., Chief Commissioner of Colonization and Development, Canadian Pacific Railway, will retire January 1, after 28 years with the company, according to the recent announcement made by E. W. Beatty, chairman and president of the system, and the department will then be divided into the Department of Immigration and Colonization and the Department of Development. J. S. Dennis, at present assistant chief commissioner of Colonization and Development, will be chief commissioner of the Department of Immigration and Colonization and Major G. O. O'Manney will be the director of the Department of Development.

Colonel Dennis, an "O.B." as he is known to old-timers, was 79 years old last October, and has had a colorful career as a soldier in Canada. He went west in 1872 at the age of 18 on survey work and in 1882 saw service against Louis Riel as commander of the Dominion Land Survey Intelligence Corps which during the rebellion was known as "Dennis Scouts". Among the outstanding work in which he was engaged was the laying out of irrigation systems later constructed in the Lethbridge region and in the great Beasano Dam irrigation project of the Canadian Pacific Railway, east of Calgary. His unrivaled knowledge of Canadian economic and agricultural development has caused Colonel Dennis to be placed among the foremost of Empire builders. Although retiring as active head of the Colonization and Development of the Canadian Pacific Railway system, he will still participate in the future development of the department since he will act in an advisory capacity to the company's directors.

Colonel Dennis has for more than 22 years given close attention to colonization problems. Since 1906 he has been immediately interested in opportunities for development and colonization in the west and entered Canadian Pacific service in 1907. He has done much work in the United States drawing attention to the unparalleled opportunities offered by the Canadian West. He was appointed assistant commissioner of the department in 1926. His ability in his chosen field was recognized by colonization experts from all parts of the continent when they elected him chairman of the Immigration committee of the American Railway Development Association. Major O'Manney joined the Canadian Pacific Railway in 1907. As a qualified civil engineer he had previous to that date done work all over the world. In 1914 he was appointed special engineer to the president, and from 1915 to 1919 was overseas with the Royal Engineers Imperial staff. On his return from the war he was appointed to Colonel Dennis' department as development engineer, to bring the natural resources of territories covered by the Canadian Pacific Railway into commercial use. He was appointed Director of Development Branch of the Department of Colonization & Development in January, 1928.

Installation of the I. O. O. F. Lodge Officers

On Wednesday evening, Dec. 8th officers and members of the I. O. O. F. lodge here were favored with a visit from the D. D. G. M. Bro. Grant, P. G. district No. 2. The occasion being the installation of the officers for 1930. After a splendid evening of the previous choice program of musical and recitationary numbers was given by several members and friends.

The chairman called upon A. P. G. W. Hill, N. G. E. T. Cooke, V. G. R. Cass, Rec. Sec. A. T. Stratton, Fin. Sec. R. Schmidt, Conductor. McCleary, Chaplain. Evan Jones, L. S. S. F. Kelett, L. S. S. B. J. Bot, R. S. N. G. W. Pannau, L. S. N. G. Madsen, R. S. V. G. Greene, L. S. V. G. S. Patterson, L. G. S. Jones, Organist.

The fourth degree which followed the lodge meeting was enjoyed by all present, including visitors from Medicine Hat, Irwin and Walsh.

ST. AMBROSE SENIOR W. A. ELECTS NEW OFFICERS

St. Ambrose S. W. A. held their annual meeting in the parish hall on January 8th at 3 p.m. Reports from each officer were very encouraging, showing that all the officers had tried to do what they could. The junior raised \$89.95 and the S. W. A. \$896.11. The following officers were elected by acclamation:

Pres. Mrs. K. Johnson; Vice Pres. Mrs. Bainbridge; Sec. of Little's Helpers, Mrs. H. Johnson; Dorcas Sec. Mrs. Bainbridge; Junior Pres. Mrs. Tanner assisted by Mrs. Rose; Sec. Treas. Mrs. Ellis.

GORDON MEMORIAL LADIES ELECT OFFICERS

Women's Masonary Society Mrs. A. W. Woodcock, Hon. Pres.; Mrs. Thacker, Pres.; Mrs. Leaning, secretary; Mrs. Collard, treasurer; Mrs. Stone, temperance secretary; Mrs. Moreson, associate helpers secretary; Mrs. Sellhorn, leader mission circle.

The Ladies' Aid Mrs. Woodcock, Hon. Pres. Mrs. Collard, president; Mrs. McCleary, vice pres.; Mrs. Smith, devotional secretary; Mrs. Stratton, secretary; Mrs. Leamouth, treasurer; Mrs. Kitcher, convener of flower com.; Mrs. Smith and Mrs. Sissons, Social com. Mrs. Leaning, convener of sewing committee.

Burns Supper And Concert on Jan. 24th

To Be Held in Gordon Memorial Church Starting at 6:30

The Burns anniversary will be fittingly observed at Gordon Memorial Church on Friday evening, January 24 when the Ladies' Aid will put on a supper and concert. The supper will commence at 6:30 and will be followed by an appropriate musical program. Admission to the supper and concert 75c. Tickets are now in circulation. Be sure to get one! All welcome.

Gordon Memorial Honors Mr. Henderson

Have Social to Celebrate His 91st Birthday

Gordon Memorial congregation Met on Monday evening the 13th to do honor to Mr. Wm. Henderson, who that day had attained the age of 91 years. E. H. Sellhorn was in the chair. A choice program of musical and recitationary numbers was given by several members and friends.

The chairman called upon A. P. G. W. Hill, N. G. E. T. Cooke, V. G. R. Cass, Rec. Sec. A. T. Stratton, Fin. Sec. R. Schmidt, Conductor. McCleary, Chaplain. Evan Jones, L. S. S. F. Kelett, L. S. S. B. J. Bot, R. S. N. G. W. Pannau, L. S. N. G. Madsen, R. S. V. G. Greene, L. S. V. G. S. Patterson, L. G. S. Jones, Organist.

The fourth degree which followed the lodge meeting was enjoyed by all present, including visitors from Medicine Hat, Irwin and Walsh.

Churches

GORDON MEMORIAL UNITED CHURCH
Rev. W. D. Smith, Pastor

Sunday, January 19th, 10 a. m. Church School, 11:15 Morning worship. Subject: "The Challenge of the Best" 7:30 Evening worship. Subject: "The Importance of Worship"

Midweek service on Wednesday at 7:30 p. m.

ST. MARY'S CHURCH
celebration of Mass, Second and Fourth Sundays of each month at 8:30 a. m.

CHURCH OF BROTHERS

Rev. Ira M. Zeigler, Pastor
Every Sunday.

Sunday School 10:30 a. m.
Morning service 11:30.
Evening service at 7:30.

Choir practice every Thursday evening at 7:30.
Everybody welcome. A special invitation is extended to those who have church home or do not attend any Synagogue.

ST. AMBROSE CHURCH
Rev. J. I. Coover
Services next Sunday, as usual

The Common Cold

Responsible For Greater Loss Of Time From School Or Work Than Any Other Cause

The writer quotes a doctor who was asked, "How do you treat colds, doctor?" and replied, "With contempt, disdain, and contempt." That can they be treated with contempt? Common colds are responsible for a greater loss of time from school and work than any other single cause. They are common in Canada and the United States than any other disease except heart disease. With the average worker, colds take more money out of his pocket every year than any other disease.

Common colds are caught in two ways—from other people, and from our own method of living.

The cold that we "catch" from other people hits us when the germ that causes it enters the nose and the nasal passages of the victim from the air which an infected person talks, coughs or sneezes. By using an unwashed tumbler, fork or spoon which has been previously used by someone with a cold, by handling something that has been used by an infected person—these things will give you a cold.

The cold that we "catch" even though we are alone, comes about usually the result of wearing too little or too much clothing, having poor circulation or some local infection of the throat or nose, or submerging one's self to rapid changes of temperature.

A minimum of damage would be done with colds if everyone were diligent to take a rest of a week or ten days immediately they become afflicted with a cold.

Just as soon as your head becomes "stuffed up" or you have other signs of a cold like soreness of the throat, discharging nose, you should start a campaign against the cold. The first day or two are the important ones.

The first thing to do is to go to bed, or at least stay in bed. The second thing to do is to keep the head warm, that may be a sign of influenza coming on; and particularly in that case you would be better off in bed under covers. A laxative should be taken. At night take a hot bath and as soon as you have rubbed yourself thoroughly dry, get into bed and again taking the very best of care that you do not catch a chill. It is well after a hot bath to put several extra blankets on the bed, so that you may do what is commonly known as "sweating the cold out of your system."

This will be aided by a hot drink.

It is a serious mistake to blow one's nose too hard, because many people have caused the infection from a cold to spread to other parts of the head, like the ears.

There are many dangers which arise from a common cold. The first of these is influenza, because it is, in apt to lead to many other serious impairments. Pneumonia, tuberculosis, heart trouble, nose and throat afflictions, rheumatism, virus trouble all have their origin in the "flu" on occasions. Many people who are deaf have lost their hearing through a common cold.

There are a number of things which we can do to prevent colds. I will give you a list of them.

- (1) If your tonsils are diseased or your teeth are bad, or you have adenoids, they should be removed.
- (2) Brush your teeth twice a day, because teeth which are diseased are frequently found to be at the root of chronic colds.
- (3) Avoid getting your feet wet. Some people who have the interests of their health at heart keep an extra pair of shoes and stockings at their place of work. Then they get caught out without their rubbers, they can change. It is costing trouble to spend the whole day with wet feet.

Exercise regularly, do plenty of water and eat nourishing, health building food.

- (4) Keep the windows open. This applies to winter and summer. Every-

one should sleep in a room where the air is fresh.

(5) Watch the thermometer. Rooms that are overheated are the cause of more colds than rooms that are under-heated. If the place where you work is not as well ventilated as it should be, and there is nothing you can do to ameliorate conditions, take a few minutes off your time and go outside and let your lungs with fresh air.

(6) Avoid drastic changes of temperature. If you have been perspiring, allow yourself to cool off gradually. It is foolish to sit in the breeze or in front of an electric fan.

(7) Stay away from infected people. When there is an epidemic, avoid crowds.

(8) Wash your hands frequently, certainly before eating.

(9) Wear clothing that helps you to avoid colds. In this country it is best to put on extra clothing when you are going out into the cold rather than wear heavy clothing such as thick underwear, when you are in the office or home.

A Romantic Career

Henry Berke, now maître d'hôtel at the Lord Nelson Hotel, Halifax, and late waiter at the Chateau Frontenac, Quebec, is a Bohemian by birth, and at the beginning of the Great War was interned with some thousands of other Czechs of military age then in England. But he and his fellow countrymen were only too anxious to come in on the side of the Allies. He was given the chance and was one of the first to join the British colors. He rose to non-commissioned rank in the famous Royal Fusiliers and saw two years of fighting, receiving many decorations. He was gassed in 1918 and so did not share the triumph of the Czech legions that marched into Prague after the Austrian Empire had crumbled. Now, instead of fighting men, he feels them in the two occupations instantly prefers the latter.

Further details of this experiment appear in the report of the superintendent of the St. Anne de la Pocatière Station for last year, published by the Department of Agriculture, at Ottawa, who states that these results confirm the results shown by a similar experiment the previous year.

The fact that the greatest profit received a mixture of cornmeal two parts, oatmeal two parts, bran one part, and one part bran, all mixed in a mash with milk. This mash made a gain in weight of 9.5 pounds over other pens receiving a mash without the potatoes made a gain of from three to four pounds less.

The next most profitable ration contained corn and one part bran. The mash in this case was made up of two parts each of cornmeal, oatmeal and bran and one part bran.

Further details of this experiment appear in the report of the superintendent of the St. Anne de la Pocatière Station for last year, published by the Department of Agriculture, at Ottawa, who states that these results confirm the results shown by a similar experiment the previous year.

Geodetic Work in Manitoba

Establishment Of Interprovincial Boundary Line Between Manitoba and Ontario

This past season, the Geodetic Survey of Canada sent a party to the north end of Island Lake, in northern Manitoba, to make a precise determination of the astronomical latitude and longitude in connection with the establishment of the interprovincial boundary between Ontario and Manitoba. The experiments will be continued and specially constructed equipment will be provided for the 'planes to be employed next year, replacing the improvised barges that were utilized during the past season.

The fact that, until recently, the Great Douglas Ice belt has been comparatively free from damaging insects, made the discovery of the Hemlock looper in the forests on the north arm of Burrard Inlet, near Vancouver, exceptionally important and alarming. Forest experts were consulted, with the result that an immediate campaign of combating the looper larvae was got under way. This taking the form of airplane dusting.

For several days 'planes maneuvered over the forest spraying the poisonous powder mass in the manner of war 'planes spreading a gas cloud or gas. Allowance had to be made for the atmospheric conditions and the drift of the wind. The powder might have the maximum effect.

Pure forest officials state that while it may take some time to determine the effect of the campaign, enough evidence of dead loopers, which are a species of caterpillars, was found to indicate success.

The white ants maintain a regular army of thousands. They are very destructive. 'Caterpillars' are also plagues. The squirrel is a ferocious animal with a sharp and a piece of bark for a nest and his tail for a sail he crosses the stream.

More than 1,100 miles of new hydro power lines in rural Ontario have been constructed this year. In addition to the 4,000 miles already in operation. The new lines, the Hydro Commission announces, will serve 6,000 consumers.

Ancient tablets recently unearthed in Egypt are the grocery accounts of Egyptian households.

World demand for mackinacs has caused a shortage in Toronto.

India is practically a negligible consumer.

"Ah, Khal, at last we are engaged."

"Yes, darling, and shall remain so always."—Hummel, Hamburg.

W. N. A. 1814

Boiled Potatoes in Poultry Ration

Better Gains and Larger Profits When Potatoes Included in Food

Cornmeal being obtained for the market, and fed on cooked potatoes as a part of the ration, made better gains and gave larger profits than other lots receiving no potatoes. Various grain mixtures, were used such as barley meal, oatmeal, bran and cornmeal mixed with milk at the rate of one and one-half pound per pound of grain.

The lot that made the greatest profit received a mixture of cornmeal two parts, oatmeal two parts, bran one part, and one part bran, all mixed in a mash with milk. This mash made a gain in weight of 9.5 pounds over other pens receiving a mash without the potatoes made a gain of from three to four pounds less.

The next most profitable ration contained corn and one part bran. The mash in this case was made up of two parts each of cornmeal, oatmeal and bran and one part bran.

Further details of this experiment appear in the report of the superintendent of the St. Anne de la Pocatière Station for last year, published by the Department of Agriculture, at Ottawa, who states that these results confirm the results shown by a similar experiment the previous year.

Will Always Be Mystery

Doctors Admit They Do Not Know Why Heart Beats

Your heart beats because it is alive. It beats 72 times a minute; which represents about 38,000,000 times a day, or 1,360,000,000 times in a life of 50 years.

The heart is a hollow muscular pump which pumps out about 50 cubic centimeters of blood with each regular rhythm. It contracts on the blood with it, in order to drive the blood onward through the whole body, for the blood carries the indispensable oxygen to every part of our frame. The heart has to contract on this blood with force, for the resistance of all the tubular blood-vessels is considerable.

It beats continually but not continuously, for it rests a short time between each beat. When we calculate how long the heart rests, and how long it works a day, we find that the figures are as 14 of rest to 10 of work.

The human heart, like that of all mammals and birds, is a double organ. Each heart has two cavities, the right and the left, which pump the blood in two directions, the right and the left side exclusively, with blue blood that has come from the veins and is being sent to the lungs. The heart on the left deals with scarlet blood which it has received from the lungs and is sending to the body. The blood goes from the right to the left by way of the lungs.

The energy developed by the heart is greater than that of any muscle. Being a force-pump, the left heart has to drive the blood, as we have seen, through considerable resistance. It has been computed that the heart of a man of average size develops in five hours enough energy to raise a thousand men one foot, or one man a thousand feet.

The human heart is neither the swiftest nor slowest type. Frogs' hearts only about half as fast; whereas the rate of the dog's heart is about twice as fast. In warm-blooded animals, the larger the animal the slower the pulse. In the case of the elephant, it is about twice as fast as in the adult.

We do not really know why the heart beats, but it is a mystery. It should know a great deal about the secret of life itself. What starts it? What stops it? What stops it? It is another mystery.

It is not the presence of blood in the heart which is beating long before any blood was formed in it. A heart will beat after all its nerves have been cut.

All we can say is that the muscle of the heart possesses the mysterious power of contracting at a rhythm of its own. We do not understand what made the beats begin.

Old Engine Superannuated

Pendulous Machine Used Since 1825 Has Been Disassembled

An old hauling engine, known as the "Pendulous Engine," which was used for drawing wagons by a wire rope up an incline, has been dismantled. The engine was of the same type and on the same incline as the engine of 1825. The docks were begun in 1828 and tradition says that before being set up, the engine had to be carried to a colliery in the west of the country. It worked regularly up to the war period. Very pendulous in character, the engine had a fly wheel 20 feet in diameter and a large up-right cylinder.

Rockets To Start 'Planes

Experiments in starting airplanes and gliders with rockets, are said to be proving successful in Germany.

The rockets will not propel the planes except at the take-off, at which the regular power will be used. The rocket auxiliary propulsion is intended to reduce the run before the take-off, and to aid the planes to rise, regardless of the load.

Turks who are unable to pay an exemption tax are conscripted and enrolled in labor battalions.

The statue of Venus de Milo is six feet three inches in height.

More than 1,100 miles of new hydro power lines in rural Ontario have been constructed this year. In addition to the 4,000 miles already in operation. The new lines, the Hydro Commission announces, will serve 6,000 consumers.

W. N. A. 1814

See Evangeline Land

Pat. a polar bear from Herschel Is. had to Mackenzie River, in the name of special interest to every child who visits the Government Zoo at Banff, in Banff National Park, Alberta. Pat's cage is always a centre of attraction at feeding time. In the large well-kept cages in the zoo, is a most interesting collection of wild animals, including specimens of the black, brown, and grizzly bear, lynx, marten, wolverine, coyote, wolf and other animals. Near the zoo is the Government museum which contains an excellent collection of big game and other animals, as well as of the bird, fish, and plant life of the region. Indian relics and examples of Indian handicrafts, including some very fine embroideries, are also shown.

Prince Has Good Memory

Lt.-Col. C. W. Peck, V.C., one of the Canadian guests at the Prince of Wales' Anniversary Day Dinner at the V.C.'s of the Empire, commented on the remarkable memory of the Prince of Wales. "I had quite a long talk with him," he said, "and all the time he was inquiring about various members of my brigade. His knowledge of them, when one considers the number of brigades he has come in touch with, amazed me."

Manitoba Fishermen

The Manitoba Co-operative Fisheries Limited, an organization of 400 fishermen on Lake Winnipeg, which began activities September 1st, 1928, reports handling 6,100,000 pounds of fish in its first season (ending April 30th), out of a total catch in Lake Winnipeg of 14,000,000 pounds.

A windmill at Sussex, England, that is 200 years old, has been converted into a tea room.

No less than 15,787 tourists visited Grand Fro Memorial Park, Nova Scotia, during the 1929 season.

The park is the property of the Dominion Atlantic Railway which acquired it before the war years and made of it a beautiful memorial to Evangeline, the heroine of Longfellow's epic of the Acadian Exile. Evangeline's Well, in its original state, forms one of the chief attractions of the park, and the National Acadian Society erected a memorial church on the property. A beautiful statue of Evangeline, executed by the well known Canadian sculptor, Helen Warriner, was placed in the park by the Dominion Atlantic Railway, and the grounds were changed from a complete wilderness into one of the most lovely spots in all Nova Scotia during the last ten years. The spirit of the memorial church is reflected in a series of lovely ponds and a fitting entrance way, constructed of logs, was erected by the railway. Thousands of tourists come from every part of Canada and the United States flock yearly to the park.

The park is a navigable waterway. The torpedoes, the ray, and the electric eel are electricians. The nautilus is a navigator. He raises and lowers his sails, casts and weighs anchor, and performs other nautical acts.

Whole tribes of birds are musicians. The beaver is an architect, builder, and woodcutter; he cuts down trees and erects houses and dams. The marmot is a civil engineer; he not only builds houses, but constructs aqueducts and drains to keep them dry.

The white ants maintain a regular army of thousands. They are very destructive. 'Caterpillars' are also plagues. The squirrel is a ferocious animal with a sharp and a piece of bark for a nest and his tail for a sail he crosses the stream.

More than 1,100 miles of new hydro power lines in rural Ontario have been constructed this year. In addition to the 4,000 miles already in operation. The new lines, the Hydro Commission announces, will serve 6,000 consumers.

Ancient tablets recently unearthed in Egypt are the grocery accounts of Egyptian households.

World demand for mackinacs has caused a shortage in Toronto.

India is practically a negligible consumer.

"Ah, Khal, at last we are engaged."

"Yes, darling, and shall remain so always."—Hummel, Hamburg.

W. N. A. 1814

WORLD HAPPENINGS
— BRIEFLY TOLD

Quarterly returns indicated that Great Britain's birds would exceed deaths by considerably less than 200,000 this year compared with 400,000 in 1920.

The U.S. National Geographic Society has announced it has granted an edit only \$25,000 to Commander Richard E. Byrd for his Antarctic expedition. The society already has granted \$25,000.

An international conference looking toward the regulation of operation of trawlers in the fishing industry off the Canadian coast will be called at Ottawa next year, the Department of Commerce, at Washington, is informed.

Allocation of millions of dollars for construction of new curers and submarines will be considered by the U.S. House Appropriations Committee in January, regardless of the usual limitation conference being held in London, England, until next year.

Former Governor Alfred E. Smith of New York, has revealed that the new Empire State building which his company is to erect on the site of the old Waldorf-Astoria hotel, will tower 85 stories into the air, thus nearly 700 feet higher than any other structure in the world.

Brazil has agreed to accept a large percentage of the German-Russian refugees, some of whom are already in Germany, while others are awaiting opportunity to leave Russia. The passport will be given refuge in Southern Brazil, where there are a number of German settlements.

Among the candidates whose names have come before the committee which will award the Nobel Peace prize is that of H. H. Kellogg, former United States secretary of state and co-worker with Foreign Minister Briand in bringing about the famous Kellogg-Briand renunciation of war pact.

The council of the Chinese government has addressed an appeal to the League of Nations and to individual signatories of the Kellogg-Briand pact to take action to prevent the Russian Soviet "invasion" of Chinese territory. The invasion was termed a deliberate violation of the anti-war pact.

Build Cottages For Britners

Canadian National Railways Has Plan To Help New Settlers

The problem of housing British immigrant families comes head-on to settle on the land is being met, to some extent at least, by the offer of the Canadian National Railways to build cottages for the Britners at various points on the prairies so that the new arrivals may secure a home at a nominal rent of three dollars a month. This offer has been approved by the Overseas Settlement Board of the British Government.

British people, forming the bulk of the immigrant tide into Canada, often suffer because they are unprepared to cope with the conditions in the farming districts of the Dominion, which are so different from those existing in the Old Country. On the other hand, immigrants from Europe, especially the northern part of Europe, are accustomed, even before they embark for the voyage overseas, to the solitude and rigors of a life where settlement has long been of the countryside untouched.

The cottages to be built by the Canadian National in the three prairie provinces will stand on a fenced plot of land averaging from one half to one acre in extent. They will be served by good roads and as near as possible to the local market place and school. They will be furnished with stoves and simple furniture.

It is understood that the families will occupy the cottages only during their first year in Canada, while they are obtaining preliminary experience in farming conditions.

There is a good deal in the "what a great philosopher has said" in the words uttered long of all days is that in which you have not laughed."

Awaiting Deportation

One Hundred Men From British Isles Are Stranded In Toronto

Upward of 100 men brought out to Canada from the British Isles during the summer to work on farms throughout the Dominion are waiting to be deported, the Toronto Telegram says. A good many of them are complaining that they are now without food and without lodging, and are wondering how they are going to live until they get work, or until the Ontario and Dominion governments see fit to deport them.

These men were brought to Canada by the St. George Society of Ottawa, the British League of Montreal, the Ontario government, and placed on farms where they were supposed to be paid \$20 a month minimum, and guaranteed continuous employment, they state, the Telegram says.

They are without any official word from any government authority as to what is going to happen to them.

"The Dominion Government Inspector, C. O. Mitchell said their cases should be being dealt with by him and the Ontario Government authorities."

Winnipeg Newspaper Union

Already

has agreed to accept a large percentage of the German-Russian refugees, some of whom are already in Germany, while others are awaiting opportunity to leave Russia.

The passport will be given refuge in Southern Brazil, where there are a number of German settlements.

Among the candidates whose names have come before the committee which will award the Nobel Peace prize is that of H. H. Kellogg, former United States secretary of state and co-worker with Foreign Minister Briand in bringing about the famous Kellogg-Briand renunciation of war pact.

The council of the Chinese government has addressed an appeal to the League of Nations and to individual signatories of the Kellogg-Briand pact to take action to prevent the Russian Soviet "invasion" of Chinese territory. The invasion was termed a deliberate violation of the anti-war pact.

There is a good deal in the "what a great philosopher has said" in the words uttered long of all days is that in which you have not laughed."

By Annabelle Worthington

A charming addition to your Fall wardrobe is a fashion velvet printed in dallas purple tones, most especially the day occasions.

The Style No. 2753 sketched emblem the curved neckline all Paris is talking about. The dress is skirt, draped at right side, shows interesting wrapped movement.

The beaming open V-neckline is finished with rolled collar. Sleeves have darts below elbows to give arms slender appearance. Front shoulders are fitted and narrowed by inverted tuck.

The bodice is long-waisted to afford hip yoke. This makes it very simple for "home" wear. After the tucks are stitched in, shoulders, the back is joined to the two front sections. The two-piece skirt with cascade drapery on right side is seamed and stitched to body. It is now ready to wear collar at neckline and set sleeves into armholes.

About two hours of your time and you have a perfectly adorable dress material with 15 yards of 32-inch contrasting to go off easily.

It comes in sizes 16, 18, years, 36, 38, 40 and 42 inches bust. It is very attractive made of black crepe in bottle green self-trimmed with feather-weight. The pattern is blue in clever zigzag pattern are made of black crepe.

For more formal wear, choose Lucerne blue transparent velvet. Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department, 2753

Newest National Park

Has Become Popular

Over Ten Thousand Tourists Visited Prince Albert Park This Year

The success of Prince Albert National Park, the most recent addition to the system of recreational lands administered by the National Parks of Canada Branch of the Department of the Interior, has been immediate. Although only established for a little more than two years it has already built up a reputation which is evidence that it will soon become one of the most popular of the Dominion's playgrounds. Until its establishment few people outside of the province itself had any conception of the rich recreational resources of Saskatchewan, a province whose name has been synonymous with vast expanses of golden grass and busy elevators.

Last year, although the park had not been opened until August 10, and those who came had to bring with them camping equipment and supplies, over 5,000 people motored the twenty miles from the city of Prince Albert to the beautiful camp site and the several miles of visitors exceeded 10,000 and it is interesting to note that the attractions included camps from the provinces of Canada and from practically every part of the United States, showing the reputation which this interesting section has already gained among nature lovers.

A site for an airplane landing has been built and already several transcontinental fliers have landed in the park. In view of the rapid increase in the number of airplanes it seems not unlikely that this may soon become one of the regular means of access to the park and that the reserve may also be a starting point for flights to regions in the far north.

Japs Want To Grow Taller

Government Hopes To Increase Stature Of Next Generation By Use Of Milk

An interesting story comes from Japan, the land of little people. It is to the effect that by the increased use of milk and milk products as a result of a government campaign, it is hoped within next generation, to increase the average height of the Japanese people by from one to two inches. The why and the wherefore of this interesting experiment was explained by one of the speakers at the National Dairy Conference, at Toronto, and it affords an interesting insight on the value of milk and milk products as articles of diet.

If the Japanese government hopes to increase the stature of its people by the simple expedient of encouraging them to drink more milk, it should be possible for the people of this country to improve their own physique by a similar method.

Canada, of course, use milk a great deal more than it has been used in Japan, but there is yet room for improvement and it might be worth while to take a lesson from the Japanese and still further build up the stature of the Canadian people by this very simple process.

Turner Valley Oil

Oil Produced In Canada Only Small Percentage Of Annual Consumption

According to E. E. Clarry, in charge of the Province of Alberta exhibit at the Produced In Canada Exhibition, Canada's imports of gasoline and oil products run to \$60,000,000 annually. "The present annual production in Canada," he pointed out, "is equal to only four days' consumption, but is steadily increasing." Turner Valley's contribution, during the first nine months of the present year was 567,042 barrels.

B.C. Whaling Season

Some 16,000 barrels of whale oil were produced during the whaling season at the two British Columbian plants of the Consolidated Whaling Company Limited, the result of operations of a fleet of six hunting vessels and a 250-ton tender. Among the 388 whales taken were a record number of sperm.

Flora Of Waterton Lakes Park

The prairie flora and the mountain flora meet in Waterton Lakes National Park in the southwest corner of the province of Alberta. Here, in the valley, and on the lower eastern slopes of the Rocky Mountains, the wild flowers bloom in May and June. In July the higher peaks are colorful with delicate blossoms of every hue.

A Freckler Plant

The plant coral-moss has neither root nor leaves, being a cluster of underground stems and an upright branch which is a few inches high and bears a number of purplish flowers.

Chickens that come home to roost have more chance than some men.

Canada To Import

British West Indies Fruits

Fifteen Thousand Crates Of Oranges From Dominica To Come Next Year

"We expect to ship from ten to fifteen thousand crates of Dominica oranges into the Maritime and Montreal markets next year," declared Captain A. D. Robertson, of Dominica, F.W.I., who arrived at Saint John on the R.M.S. Lady Nelson, of the Canadian National Steamship, from the West Indies.

Captain Robertson, who took up the cultivation of oranges and grapefruit at Dominica as a hobby after the war, stated that there were excellent possibilities for the cultivation of citrus fruit on the Island of Dominica, and he said that at the Manchester Exhibition, the Dominica oranges and grapefruit captured first place over the California product. Eighty per cent of his present consists of Washington navels, all grafted on sour orange stock. A unique feature of the Dominion citrus industry is that on his estate he discovered several trees of Valencia, which had no need of his vineyard grafting.

For the industry, which, in his opinion should be cultivated in Canada, he said that the Dominion oranges and grapefruit were of a superior quality.

The backwardness of the development of the citrus fruit industry in Canada, Captain Robertson stated, was due to the lack of adequate steamship service, but with the advent of the Canadian National steamships, the industry was enabled to develop. He has associated with him in the Dominion, Captain Robertson stated, who accompanied him on his trip. The climate of Dominica, Captain Robertson declared, was delightful, with an average temperature of 75 degrees.

Captain Robertson was associated with the Canadian citrus industry, serving on the Bulgarian and Western Fronts.

Naturalists Find Large Worms

Specimens Discovered In Australia Six Feet Long

Earthworms longer than a man and an inch in diameter are reported in the British scientific magazine "Nature" as the quarry of a naturalist's hunt in southeastern Australia. Average specimens range from four to six feet in length, and one fine foot long was observed by Charles Sturt, member of the expedition. An extreme length of eleven feet was reported though not seen on this expedition.

The worms make loud gurgling noises when they retire into their burrows on the approach of a possible enemy. Their greenish-translucent eggs have tough, horny shells, and are from two to three inches in length.

Applicant: "And if I take the job and I get a raise in salary every year?"

Employer: "Yes, provided, of course, that your work is satisfactory."

Applicant: "Ah, I thought there was a catch in it somewhere!"

Fewer Forest Fires

Loss In Canada Last Summer Was Comparatively Low

Loss of timber by forest fire in the past summer were comparatively low. Up to the end of September, British Columbia had 2,011 outbreaks, and of these half had been in the southern interior where the hazard for some time has been extreme. In the prairie provinces the area burned has been high, and it is feared that the losses will be found to be serious. In Ontario the amount of the commercial timber burned is reported as comparatively low, that is, in the districts which have been within the limit of possible protection, not including northwestern Ontario. In Quebec, the fire losses are probably below normal. In the Maritimes, where the hazard has been higher than in many years, the losses again are comparatively low.

The Scientific Fisherman

Carries Thermometer When Going After Trout And Other Fish

The fisherman of today writes "Laker-Own" in the London Daily Chronicle, is something of a scientist when compared with his prototype of a few decades ago, for he now carries a thermometer when going to fish. It has been price, that catches fish frequent waters of a particular temperature, hence if the nature of the water is known, the fisherman can be made most suited to the kind of catch that is expected. Cold, for example, has a preference for water of 62 degrees, and from near the coasts of Newfoundland and Labrador, where the water is of this temperature, enormous quantities of fish have been caught.

Increase In Life Insurance

\$650 In Insurance For Every Man, Woman and Child in the Dominion

The total amount of life insurance carried by the people of Canada is at present about \$650,000,000 or approximately \$650 for every man, woman and child in the Dominion. The United States with \$750 per head of population is the only country in the world that exceeds Canada in the amount of life insurance carried.

The number of life insurance policies in force in Canada is 7,000,000 in round figures, or about three for every family in the Dominion. An encouraging fact about life insurance in Canada is that no one has ever lost a cent as a result of the failure of a Canadian life insurance company, which is principally due to the supervision of the Canadian Government Department of Insurance over the industry for the protection of policy holders.

Over \$300,000,000 is paid annually by the people of Canada in life insurance premiums. In the past 10 years the number of policies carried has doubled and the assets of the Canadian life insurance companies is placed at \$1,200,000,000.

A new and hitherto unknown route across the Rocky Mountains has been discovered through a pass into British Columbia, on the western boundary of Jasper Park, Alberta.

Peanuts are used in the manufacture of several varieties of wood stains.

FOR SALE—good much cow
in good shape; milking 2 gallons
a day. Apply to Mrs. O. Sivens,
3rd street, South, Redcliff.

The entertainment given by the
Georgia Singers in the Cameo last
Tuesday evening under the aus-
pices of the local Legion, was not
as well attended as the program
deserved. This company is
made up of excellent talent, and
puts on a most amusing and en-
tertaining program.

Mr. Alex. McColeman, former-
ly of Redcliff but now manager
of a large brick plant at Cay
Bank, Sask., was in town last
Tuesday looking up old acquaint-
ances. Mr. McColeman was at-
tending a meeting of the Clay
Products Association, which
was held at Medicine Hat.

Two good shows are billed for
the Cameo again this week. On
Monday "Desert Nights," tells
a vivid and graphic story of three
adventurous men, one of the
men is a native of an African
desert. His plot carries a most
unusual love theme. On Thurs-
day "The Cavalier" gives a vivid
picture of the chivalry of olden
days. Both shows have good
comedies.

In the great Chinese province of
Manchuria, equal in area to Great
Britain, Marshal Liang Chang, 23-
year-old war lord, is experiment-
ing with education on a colossal
scale to bring his war-torn people
to peace and progress. In the
statement of John Nelson, a mem-
ber of the Chinese Nationalist Party,
who recently landed from the Em-
pire of China at Vancouver on his
return from the Orient.

Great industrial development
throughout western Canada which
in the last two decades has brought
the annual gross value of manu-
factured goods produced in the west-
ern provinces to \$120,000,000 was
recently by John F. Sweeting, industrial commissioner
of the Canadian Pacific Railway, in
an address to officers of the com-
pany at Winnipeg. "Those of us
who have lived through and watch-
ed western Canada develop into
during the last 20 years are as-
sured as to the future of that part
of the Dominion," he said.

"Railway conditions as they exist
in Canada today are readily com-
prehensible and we are in the for-
tunate position of being able to as-
sure our shareholders that the de-
cisions represent the result of an
extraordinary combination of the
conditions and that the railway have
not failed in efficiency or enter-
prise," stated E. W. Beatty, chair-
man and president of the Cana-
dian Pacific Railway, in an ad-
dress at the annual meeting of the
Canadian Travelers' Association of
Canada. Mr. Beatty added that the
situation in 1929 was exceptional
and not likely to be repeated in
subsequent years.

The North German Lloyd Com-
pany of Montreal is arranging for
a trip of German farmers to Canada
next summer with a view to inves-
tigating Canadian conditions and
opportunities. The trip will com-
mence with a visit to
Annapolis, N.S., and ending at
Kensington, to view the Government
Farm and the excellent country of
Nova Scotia.

The Department of Lands and
Forests reports that 1400 muskox
and 123 deer were killed in Nova
Scotia during the hunting season
of 1929.

New Brunswick's potato crop for
1929 will have an official valuation
of at least 250,000 placed upon it
according to valuations of the Pro-
vincial Department of Agriculture
officials, when the final report on
agricultural conditions for the crop
season was issued recently.

NOTICE

Re: Tally East Area Leases

The Board appointed to ad-
minister lands in the above area
will proceed to allocate leases as
of February 1st, 1930, and ap-
plications now in the hands of
the Board, and any others arriv-
ing up to that date, will be there-
with.

All applications should be
made to the Secretary, Tally
East Area Board, Care of the
Department of Municipal Affairs,
Edmonton.
